CO1.1 and CO2.1 Evaluation

Project Report

Fall 23-24

Project Title: Clothing Shop Management System.

Section: I

Group No: 03

Student Name	Student Id
MD AMINUL ISLAM AMIN	21-45230-2
MEHERAB HASSAN BORNO	21-45236-2
SAKIBUR RAHMAN	21-44964-2
MD. NAJIB HOSSAIN	21-45366-2

Clothing Shop Management System.

Introduction:

By developing this web application, we seek to modernize and optimize the clothing retail process, providing a user-friendly platform for shop owners to efficiently manage their business.

Background Study

Since, this project is based on ecommerce website management system, to develop this project we have taken some idea from above online shop websites.

Examples:

<https://www.rokomari.com/>

<https://www.daraz.com.bd/>

<https://portal.aiub.edu/>

Requirement Analysis:

1. User Category:

There are 5-types of Users here. They are:

- Admin.
- Employee Manager.
- Order Product Manager.
- Customer Service Manager.
- Customer.

2. Feature List:

In this project the “Admin” has the following features:

- User Administration. (Handle approval requests)
- View Total Sales. (Check the overall sales amount for products sold)
- View Total Revenue. (Display revenue earned from product sales)
- View Most Sold Product. (Identify and display the product with the highest number of sales)
- View Total Employee Wage. (Display the total amount spent on employee salaries)
- Send Dashboard Report via Email. (Allow admins to send dashboard records to a specified email address)
- Email Authentication. (Required for user sign-up)

Clothing Shop Management System.

In this project the “Employee Manager” has the following features:

- Manage Employee Data. (Add, remove, or update employee information, including name, national ID, phone number, email, position, and address)
- Attendance Tracking System. (Record attendance for all employees)
- Salary Sheet Generation. (Generate salary sheets based on attendance and performance)
- Print Reports. (Managers can print total salary sheets along with basic employee information)
- Send Report Copy to Admin's Email.
- Email Authentication. (Required for user sign-up)

In this project the “Order Product Manager” has the following features:

- Manage Shopping Cart. (Add or remove products from the shopping cart)
- Apply Filters. (Filter products by price)
- Checkout Process. (Manage the payment system, verify billing address, and confirm orders)
- Print Invoices.
- Email Invoices to Customers.
- Inventory Management. (Add, remove, or update products in the inventory)
- Email Authentication. (Required for user sign-up)

In this project the “Customer Service Manager” has the following features:

- Customer Support Tickets (Allow customers to raise support tickets for inquiries, complaints, or returns.)
- Can see Top Customers (Based on maximum amount earned from a customer, top customer will be displayed.)
- Product Rating System. (While taking product, customer can give quality rating to each product)
- Feedback and Reviews. (Allow customers to leave reviews and feedback on products and services)
- Email Notifications. (Send order confirmation, shipping updates, and feedback requests via email)
- Email Authentication. (For sign up)

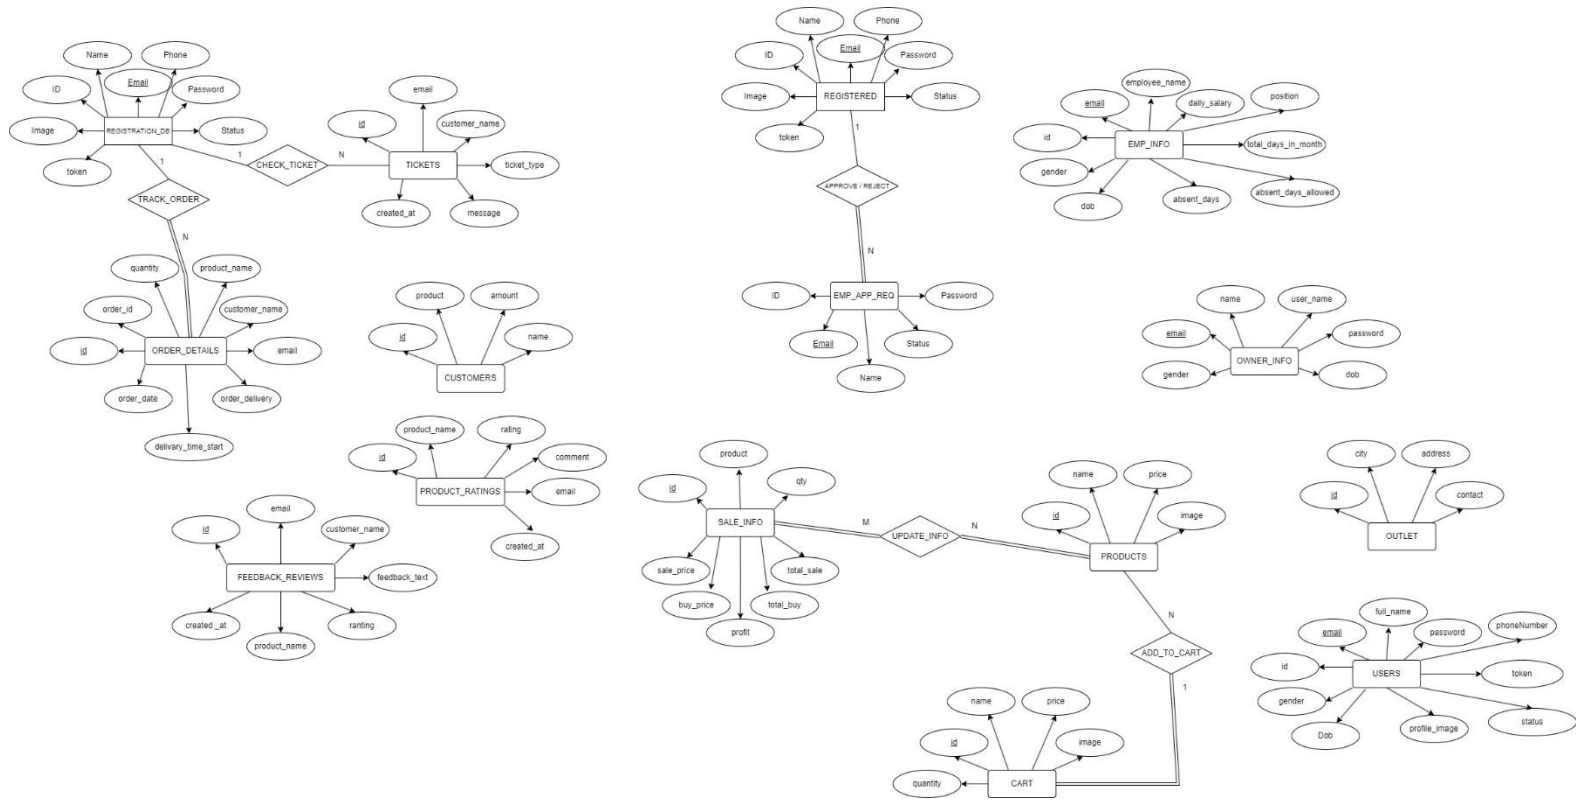

In this project the “Customer” has the following features:

- Can request for approval. (Accept or Reject)
- Manage Shopping Cart. (Add, remove products from shopping cart)
- Apply Filter. (Filter products by price)
- Checkout Process. (Manage the payment system, verify billing address, and confirm orders)
- Live Product Stock.
- Rating Review & Feedback.
- Customer Support Tickets.

Clothing Shop Management System.

ER Design:

Tools Used:

To develop this project, we have used the following:

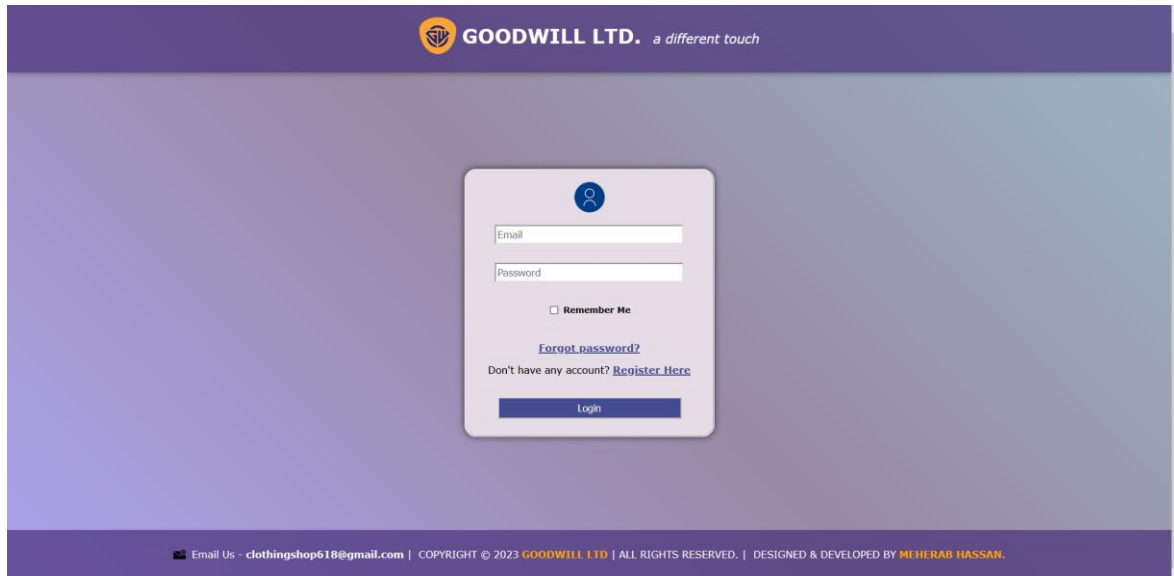

- Visual Studio Code
- Notepad++
- Sublime Text
- XAMPP
- Microsoft Edge
- Draw.io

Clothing Shop Management System.

System Images against the Specification:

Admin:

The image shows the Admin Login page for the Clothing Shop Management System. The page has a purple header with the logo and text "GOODWILL LTD. a different touch". The main content area is a light purple gradient. In the center, there is a white login form with a blue user icon at the top. The form contains fields for "Email" and "Password", a "Remember Me" checkbox, a "Forgot password?" link, and a "Don't have any account? Register Here" link. A blue "Login" button is at the bottom of the form. The footer is a dark purple bar with contact information: "Email Us - clothingshop618@gmail.com | COPYRIGHT © 2023 GOODWILL LTD | ALL RIGHTS RESERVED. | DESIGNED & DEVELOPED BY MEHERAB HASSAN."

The image shows the Admin Password Reset page. The page has a purple header with the logo and text "GOODWILL LTD. a different touch". The main content area is a light purple gradient. In the center, there is a white form with a blue padlock icon at the top. The form contains a field for "Enter Email Address" and a blue "Send Reset Link" button. Below the button, there is a "Don't have any account? Register Here" link. A red back arrow is located in the bottom left corner of the main content area. The footer is a dark purple bar with contact information: "Email Us - clothingshop618@gmail.com | COPYRIGHT © 2023 GOODWILL LTD | ALL RIGHTS RESERVED. | DESIGNED & DEVELOPED BY MEHERAB HASSAN."

Clothing Shop Management System.

Description:

The admin panel in our Clothing Shop Management System empowers administrators with centralized control. It facilitates seamless management of employees, sales, customer services and user roles, ensuring efficient oversight and strategic decision-making for the clothing shop.

Impact of this Project:

In the modern retail landscape, the Clothing Shop Management System contributes to sustainable practices by optimizing employee, sales, reducing waste, and enhancing customer satisfaction. Efficient management leads to streamlined operations, minimizing environmental impact. Shop owners benefit from improved profitability, while customers enjoy a seamless shopping experience and feedback. This project aligns with contemporary values of efficiency and sustainability, promoting positive impacts on both society and the environment.

Limitations:

- Limited customization: The system may not accommodate highly specific or unique business processes.
- Security concerns: Although security measures are in place, potential vulnerabilities may exist.
- Compatibility issues: The system may face compatibility challenges with certain browsers or devices.
- Optimization and UI: UI can be more user friendly; Database can be more optimized.

Clothing Shop Management System.

Possible Future Improvements:

Future improvements for the Clothing Shop Management System could include:

- Integration of AI for demand forecasting.
- Enhanced mobile responsiveness for on-the-go management.
- The loyalty program features to boost customer engagement.
- Advanced analytics for data-driven insights.
- Integration with e-commerce platforms for broader reach.
- Implementation of additional security measures for data protection.
- Integration of machine learning algorithms to optimize pricing strategies and other things.
